SAFETY, INSULATION & STRENGTH

Precise Thermal Break

1

Increased thermal efficiency is achieved by our conduction-resistant thermal break.

Insulated Tongue & Groove

2

Our joints are sealed with insulating foam and joint tape to reduce air flow and heat loss.

Custom Overlays on Polyurethane Insulated Panels

3

Weather-resistant, custom-machined Extira overlay material enables multitudes of design options along with the beauty of recessed window placement. Triple-reinforced steel extends across the entire section for robust hardware mounting. An internal steel layer creates additional stability.

Proprietary Urethane Blend

4

Perfected over generations, our precisely-engineered polyurethane outperforms its competitors in strength, energy efficiency, and density every time.

Steel Internal Construction

5

Our top-of-the-line galvanized steel is treated with 4 layers of strength and weather resistance.

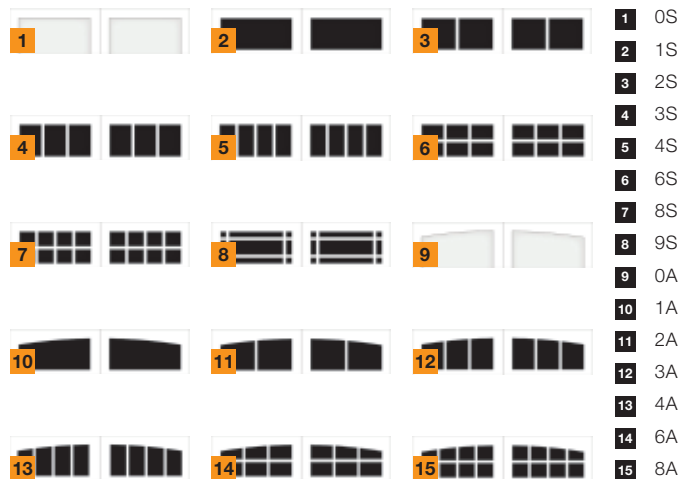

Section Detail

SECTION DETAIL

Our Clima Elite window mullion has no joints, attractive detailing, and crisp corners. Glass is sealed with bonding tape around the perimeter of the window and on the back of the grid, providing superior weather protection and greater ease when field painting.

WINDOW DESIGNS
